

Totally  
customisable!  
Update in a  
web browser!

## *Software that's so cool, it's hot!*

Sprocket's Fastfind<sup>®</sup> software is a content management system that allows you to instantly update your Digital Directory Board quickly and efficiently.

Fastfind<sup>®</sup> is completely customisable through its simple browser based admin module so you can choose how you want your tenant list to look and operate. It's also packed with value-add features so you can keep your Directory Board dynamic and informative with custom scrolling messages, dual language display, webfeeds, company logos and even advertising content.

Fastfind<sup>®</sup> is lightweight and so flexible you can even choose how you would like to update your content. With 3 available configuration and pricing options, you can choose to update via the web, across a network or by connecting a USB keyboard directly to the Directory Board itself.

Stay fresh and save valuable time and money with Fastfind<sup>®</sup> – with a solution to fit every budget, we will help you find your way...
