

EuroTouch Kiosks - FlexiAdjust

Product Description:

The FlexiAdjust is an adjustable information terminal, with a wide range of applications. Slim lines, softened edges and a superior finish ensure a first-class appearance. The FlexiAdjust is handicap friendly and specially developed for wheelchair users. Monitor and keyboard can electronically raise and lower up to 45 cm.

The internal workings of the FlexiAdjust offer numerous options when it comes to the variable integration of additional components, enabling the unit to be adapted perfectly to the customer's technical requirements.
