

EuroTouch Kiosks - FlexiBasic

Product Description:

The FlexiBasic is a light universal kiosk or information terminal with a wide range of applications. The slim lines, softened edges and superior finish provide contemporary styling and ensure a first-class appearance.

The combination between an angled monitor and height of the FlexiBasic (52"), offers the best combination to serve the integrated touch monitor.

The customizable, interchangeable front panels and variable colors offer sufficient individual design possibilities and branding to accommodate any and every customer requirement.
